RESCUE Intellitech Joins Cancer Research UK's "Walk All Over Cancer" Initiative in March

RESCUE Intellitech, a leading manufacturer of decontamination washing machines, announced today that it will participate in the "Walk All Over Cancer" initiative, a month-long campaign organized by Cancer Research UK to raise funds for cancer research and awareness.

MALMÖ, Sweden, March 1, 2023 – Throughout the month of March, employees of RESCUE Intellitech will pledge to walk 10,000 steps a day to support the fight against cancer. The company has also committed to donating £4,000 to Cancer Research UK in support of this vital cause.

As a company that is dedicated to promoting health and safety, RESCUE Intellitech recognizes the importance of supporting initiatives that aim to eradicate cancer. The company's decontamination washing machines, known as "decon washers," are designed to help reduce exposure to dangerous chemicals such as PAH, which have been linked to cancer.

"We are proud to join Cancer Research UK in its mission to find a cure for cancer and raise awareness of this terrible disease," said Martin Valfridsson, CEO of RESCUE Intellitech. "We believe that supporting this initiative is a crucial step in the fight against cancer, and we are honored to play our part."

The "Walk All Over Cancer" initiative encourages people to get active, make healthier lifestyle choices, and raise funds for life-saving cancer research. RESCUE Intellitech invites other companies to join them in supporting this cause and making a difference in the lives of cancer patients and their families.

If you want to contribute, you can place a donation at the link below.
