

BRING YOUR DIRTY GEAR

See decontamination in action.

Join Rescue Intellitech, Inc. and the St. Louis Park Fire Department for a complimentary live wash demonstration focused on cleaning hard-goods PPE and equipment, reducing exposure to harmful contaminants and supporting firefighter cancer-prevention efforts.

See the difference yourself.

Bring your SCBAs, helmets, masks, gloves, boots, tools and other hard-goods equipment to see the cleaning process firsthand and learn how automated decontamination can provide a more consistent approach than traditional soap-and-water cleaning alone. You'll also learn more about:

- Why equipment that looks clean may not be properly decontaminated, and how contaminants and detergent residue can remain after previous cleaning.
- Preventing cross-contamination after the call.
- Limiting exposure through PER.
- How clean gear supports efforts to reduce exposure to harmful contaminants and lower occupational cancer risks.
- How St. Louis Park has put successful decontamination initiatives and protocols into practice.

Already have a Solo Rescue at your facility? Stop by to get updated on best practices and protocols for proper PPE decon.

RSVP by October 29 to Nick Samp, nsamp@rescueintellitech.com

Tuesday, November 3
10:00 a.m. – 2:00 p.m.
Drop in anytime. Bring your
dirty gear and stay as long
as your schedule allows.
